SUMMARY

I am a hardworking **MCA graduate (2024)**. I have spent the last year (Sept 2024 to Sept 2025) in intensive training to learn Full Stack Web Development. I am very good at building websites using **React, Node.js, and MongoDB**. I am looking for my first job where I can work hard, learn from seniors, and help the company grow.

SKILLS

- **Frontend:** HTML, CSS, JavaScript (ES6), React.js, Tailwind CSS.
- **Backend:** Node.js, Express.js.
- **Database:** MongoDB (Atlas & Compass).
- **Other Tools:** Git, GitHub, Postman, Netlify, Render, Vercel.

EDUCATION

- **Master of Computer Applications (MCA)** | 2022 – 2024
  - *Datta Meghe Institute Of Higher Studies And Research*
  - Completed all semesters and exams. (Official certificate awaited).
- **Full Stack Development Training** | Sept 2024 – Sept 2025
  - *Road To Code Academy*
  - 12-month intensive program focusing on building real-world MERN applications.

PROJECTS

MERN Blog Application

- Built a full-featured blog where users can create, read, update, and delete (CRUD) posts.
- Created a backend using **Node.js** and **Express** to manage articles and images.
- Used **MongoDB** to store user data and blog content securely.

MERN Chat API

- Developed a backend system that allows users to send and receive messages in real-time.
- Focused on creating secure **REST API** endpoints for user authentication and chat history.

- Tested all API routes using **Postman** to ensure the system is bug-free.

Pro-Tasker (To-Do List Application)

- Created a task management tool to help users organize their daily work.

- Built a clean **React** frontend that updates instantly when a task is added or completed.

- Integrated a database to ensure tasks are saved even after the page is refreshed.

Professional Personal Portfolio

- Built a personal website to show my coding skills using **React** and **Framer Motion**.

- Engineered a custom **Backend API** to save contact messages directly into a database.

- Focused on high-end design and making the site fully mobile-friendly.

STRENGTHS

- **Quick Learner:** I spent a full year learning new technologies and I am ready to learn more.

- **Problem Solver:** I enjoy fixing bugs and making code work perfectly.

- **Dedicated:** I am ready to put in the extra hours to complete tasks on time.
